VITRUM DESIGN

OUR
COMPANY

CLOUD | KNX®

Vitrum Design is an made in Italy company that revolutionize the idea of home automation with a complete collection of electronics for your home management, combined with Italian design and eco friendly approach for a worldwide unique formula. We make your everyday life easier, with a simple and stable home life technology. Upgrade your classic switches with our smart and iconic designed ones, that reduce your home consume and make it simple.

Vitrum Design contributes for a more sustainable lifestyle model:

for a future we want to live.

F R A M E S

O F L I F E

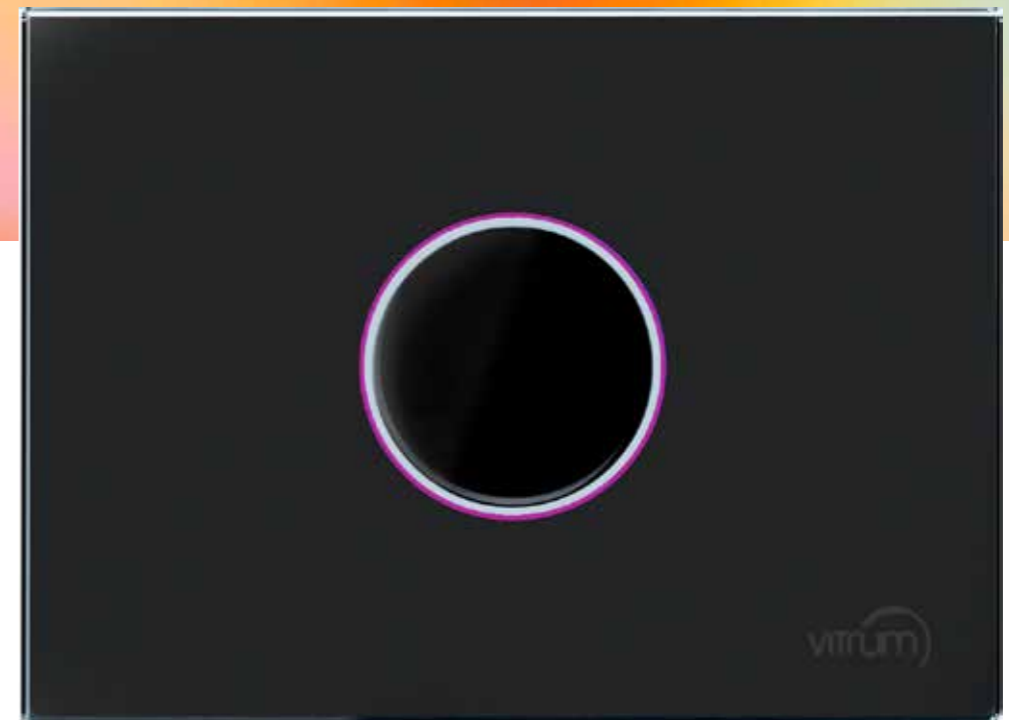

Elegance and attention to detail.
Designed for those seeking an exclusive lifestyle.
To stand out from all the rest.

T O T A L B L A C K

In the Glass Collection the etched black glass surface is finished with a frame in the same tone to achieve an updated, elegant look.

S E N S O R I A L
F E E D B A C K

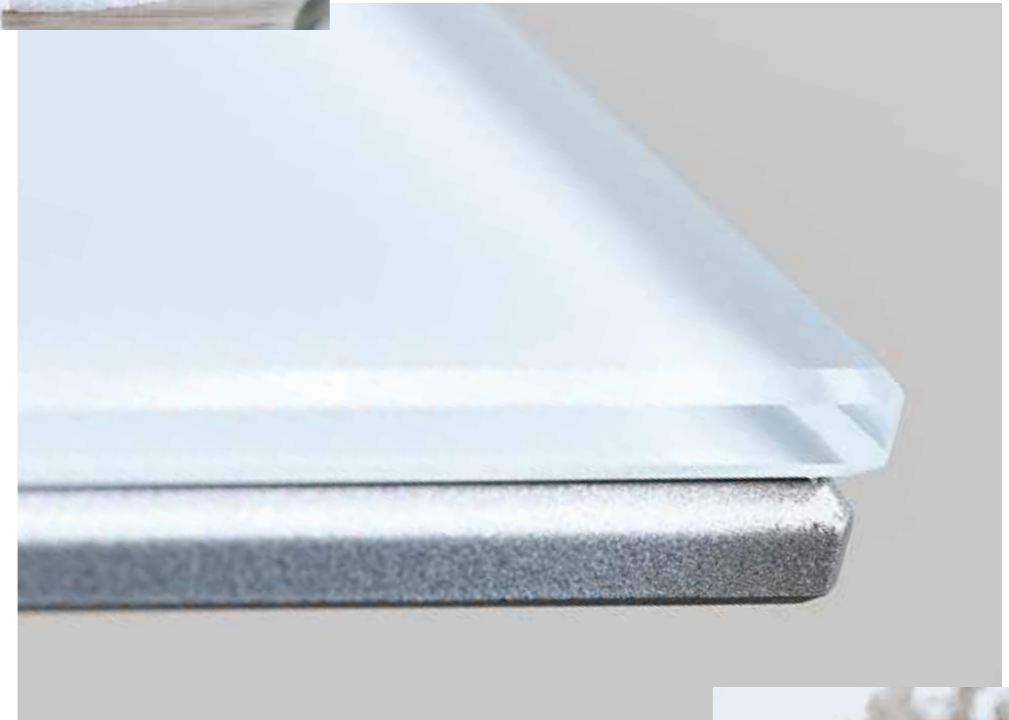

Vitrum Design redefines the concept of switch.
Status LEDs and backlit icons, seven colours
that can be associated with functions and buttons,
sound feedback with each command.
The only limit is your imagination.

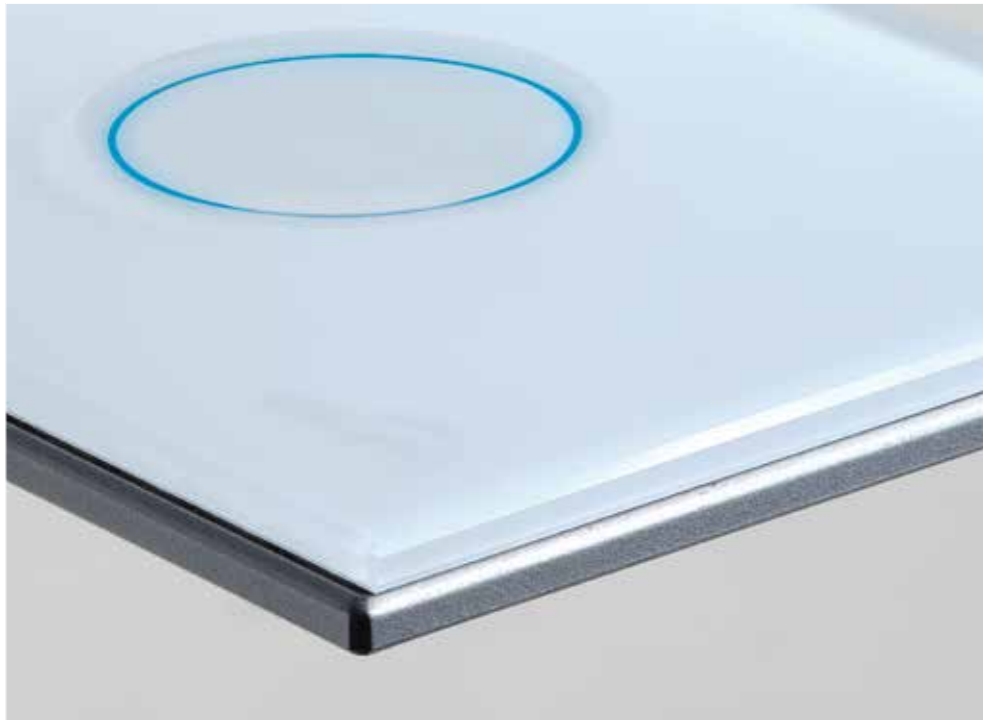

FRAMES

OF LIGHT

Illuminate to add beauty to your living spaces.
Eliminate the unnecessary
to simplify the design.

FRAMES OF LIGHT

TOTAL CUSTOMIZATION

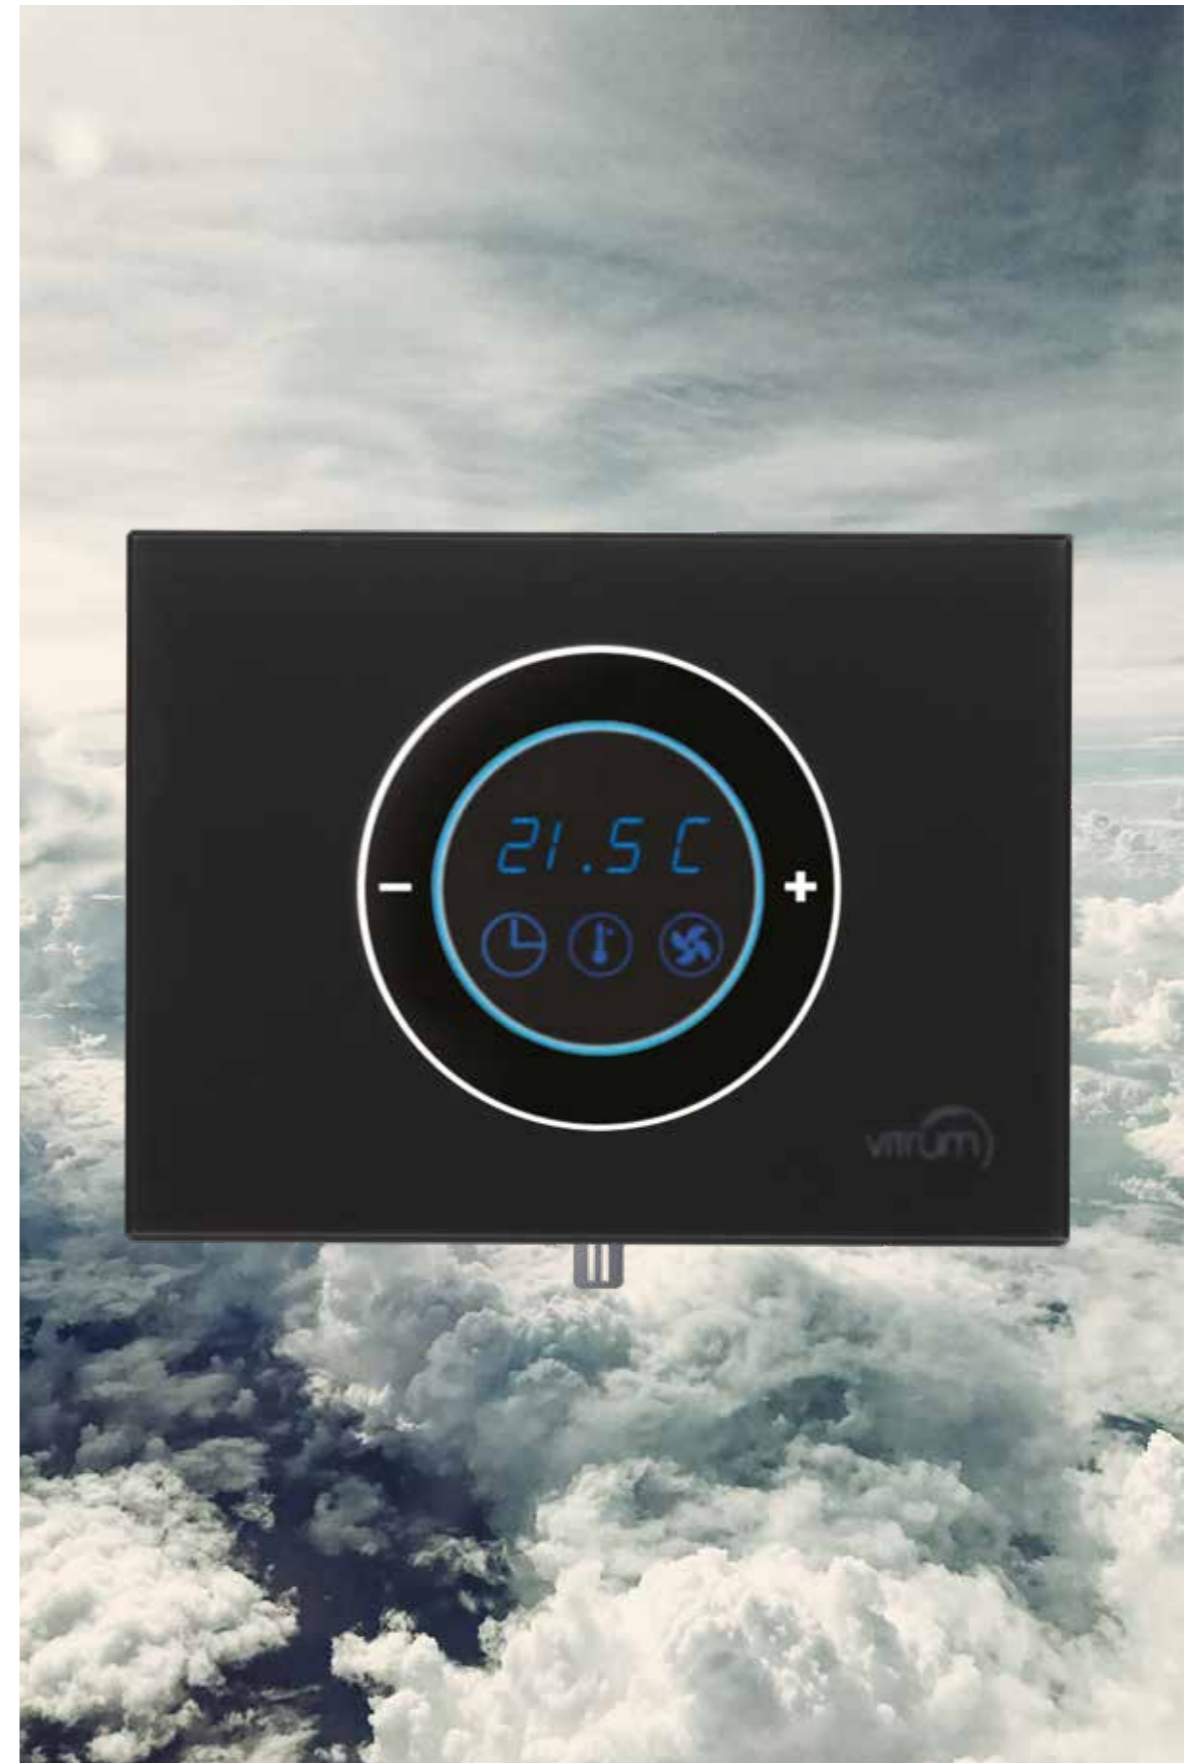

Vitrum Design lets you turn on, turn off and adjust the lighting to create inviting living spaces. Every single button can be personalized to execute the desired function, making the experience even more intuitive.

FRAMES

OF LIVING

Sensors, voice assistant,
smartphone app, facial recognition.
Vitrum Design offers infinite possibilities for interaction.
You decide.

TOTAL COMFORT

Control temperature, humidity and air quality
with just one touch.
Comfort and technology merged to deliver total control.

FRAMES OF

COLLECTIONS

VITRUM DESIGN

THE SIMPLE FUSION
OF SHAPE AND MATTER.

THE FINENESS OF GLASS,
THE HARMONY OF STONE,
THE CUT OF THE MATERIALS,
THE SINUOSITY OF THE SHAPES.
THE NEW COLLECTIONS
SURPRISE FOR THEIR DESIGN.

Vitrum Design transforms spaces into a new,
more evolved experience of style.
For those looking to stand out.

GLASS

Purity becomes control.

Transparency, brilliance, luminosity:
 Glass is where the concept of Vitrum Design originates
 and finds its primordial expression.
 The result is totally unique.

Vitrum Design Glass is available in all RAL colours.
 You can personalise the product with the RAL colour of your choice or with screen printing.
 Visit vitrum.com to view the whole range.

STONE

Technology meets art.

Rock is slenderised, stripped of its imperfections and sharp edges.
 The luminous circle is replaced by a precise laser incision
 that makes the control identifiable by touch.

Stone is given new life.

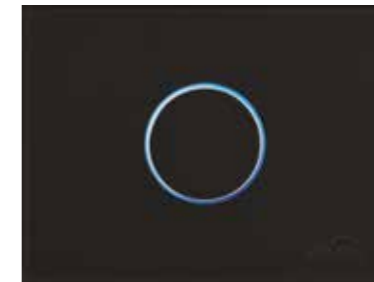

Billemi Grey Marble, Imperial Brown Marble, Green Marble of Guatemala,
 Matraia Stone, Semi-polished Piasentina Stone, Bocciarda Stone.

TECH

Contemporary cut, modern feeling.

The clean, modern design embraces the delicacy of the glass.
Vitrum Design Tech is renewed to add character to contemporary and technological environments.

Vitrum Design Tech is produced in glass and has a smooth surface with no recesses.
It is available in the versions White Tech with satin-finish frame or Black Tech with black frame for an all-black effect.

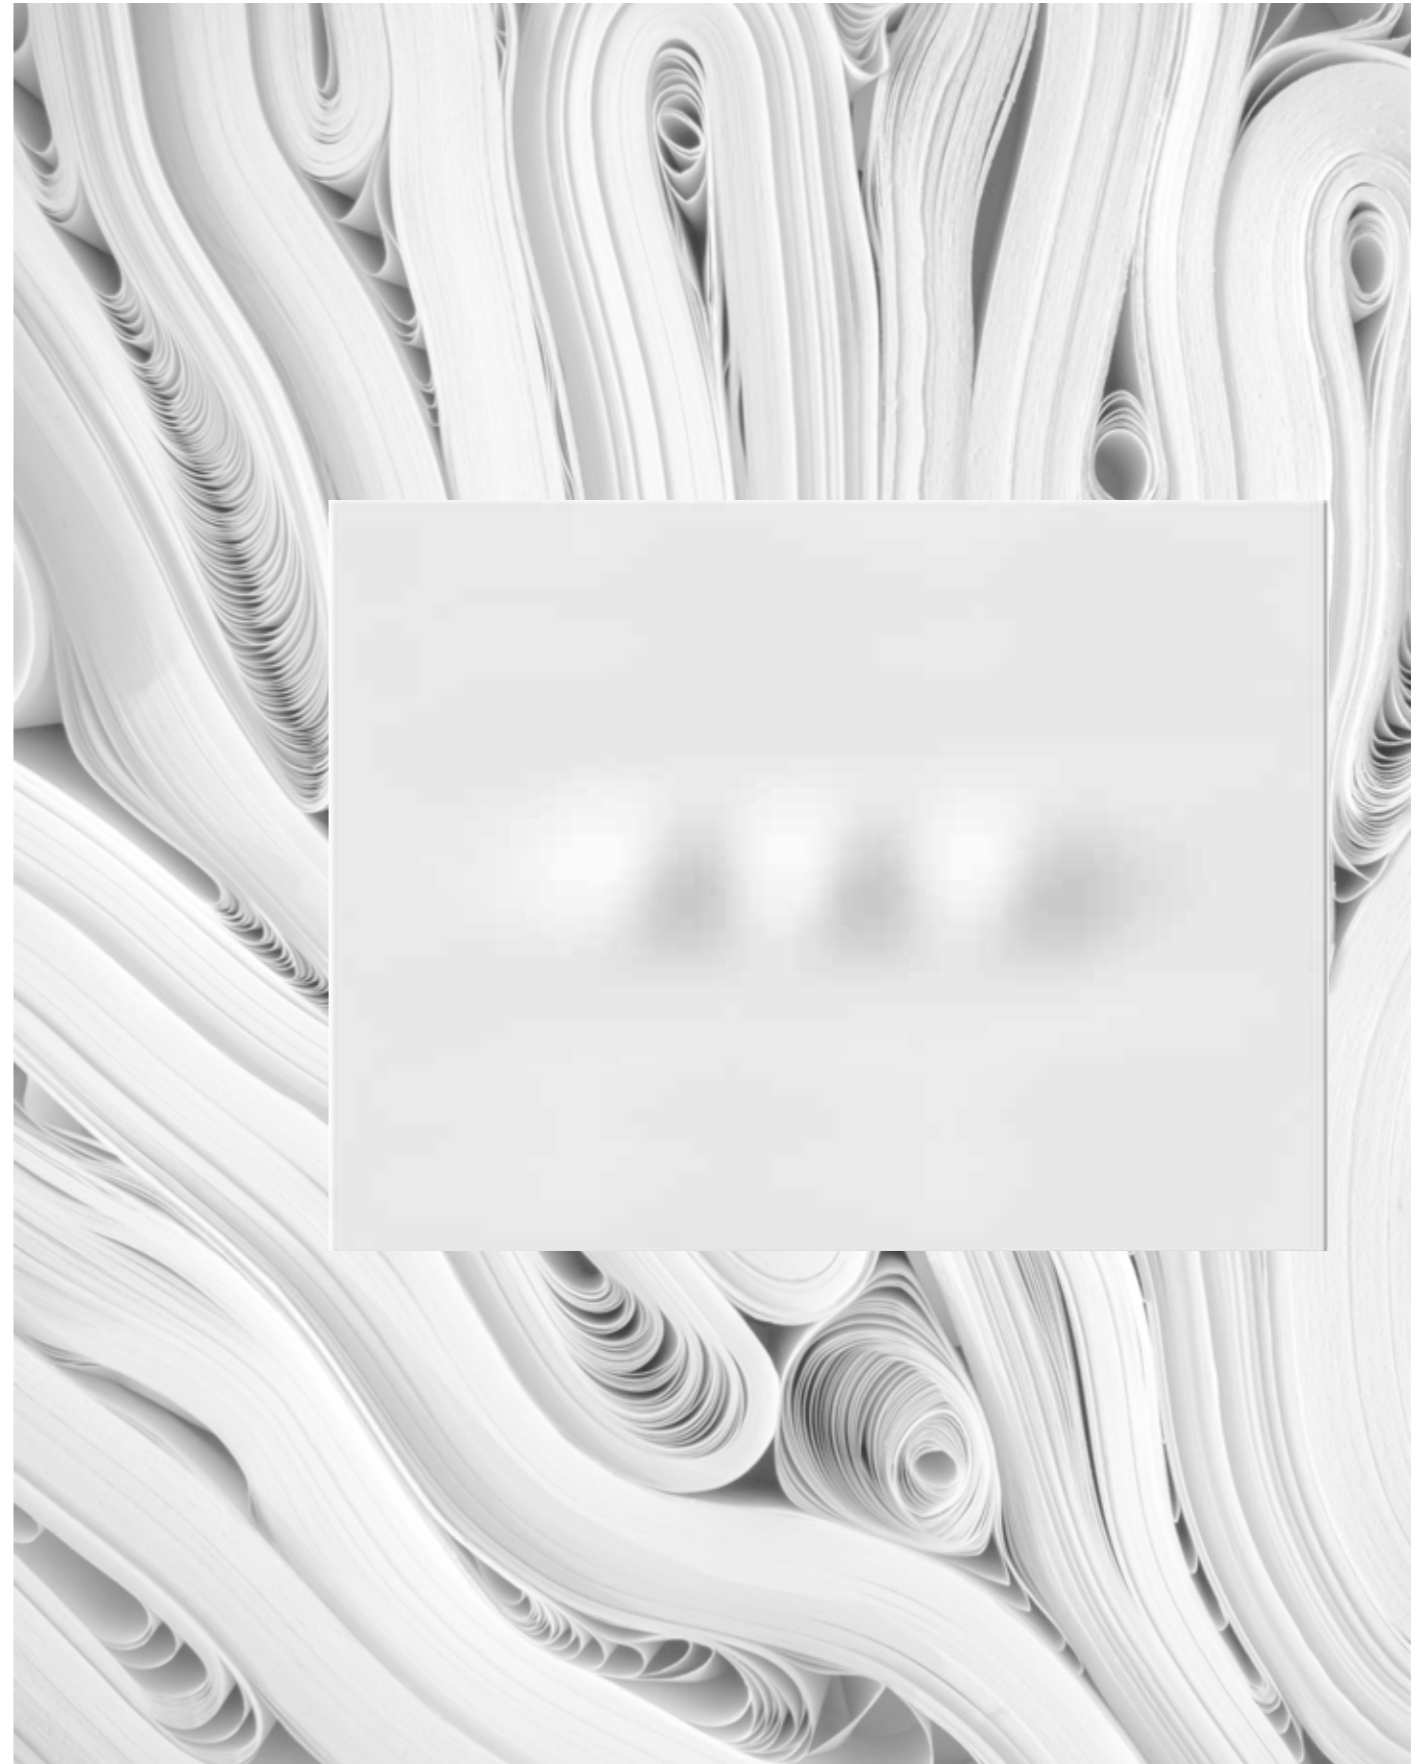

s e n s e

Inspired by the shapes of nature.

Form, light and sound combine to create a unique use.
Elegant, sinuous and linear like shapes found in nature.
Simple and universal, fusing form and movement.

The raised texture of the buttons allows the fingers to activate controls naturally.
The actions are confirmed by the response of the luminous circle.
Sounds complete the execution of the command and the system status.

FRAMES OF

TECHNOLOGY

**THE ELEGANCE OF
VITRUM DESIGN PRODUCTS
IS COMPLEMENTED BY LATEST
GENERATION TECHNOLOGIES IN
STEP WITH THE MOST IMPORTANT
INTERNATIONAL STANDARDS.
INTERCONNECTED OBJECTS
THAT ACQUIRE AUTONOMOUS
INTELLIGENCE.**

Configuring and managing your home is simple and reliable thanks to home automation from Vitrum Design. Two systems – Cloud (Z-Wave Plus) and KNX (cabled) – for unlimited uses and situations.

CLOUD

CLOUD SYSTEM

The Wireless series is more advanced thanks to the new cloud-based infrastructure and UFO, the latest-generation controller from Vitrum Design.

VITRUM DESIGN

SMART LIVING

Intelligent Vitrum Design devices allow professionals to use the new dashboard to configure system functions starting from scratch. The beauty of the luminous circle, the brand's icon, redefines the concept of switch design and raises the standard in the home automation sector.

The Cloud line embraces a fully redesigned wireless cloud-based system. Products of the Cloud line can be installed in a traditional electrical system (230V), the devices' distributed intelligence does the rest. The Cloud line integrates with products that utilise other protocols, such as Wi-Fi or Bluetooth Low Energy (BLE) systems.

CLOUD

ECO FRIENDLY

Vitrum Design contributes to a greener environment. UFO allows you to avoid unnecessary waste by monitoring consumption and optimizing the heating of the house, room by room, even when you are not there.

H O M E C O N T R O L

With the Cloud system you can have a virtual weather station and an astronomical crepuscular clock at your service. You can manage automatically the functions of your house by limiting consumption. Keep everything under control how you want and when you want.

CLOUD

U F O
I I G E N E R A T I O N

The only controller that integrates environmental sensors, voice commands and self-learning artificial intelligence in a single object.

VITUM DESIGN

A R T I F I C I A L
I N T E L L I G E N C E

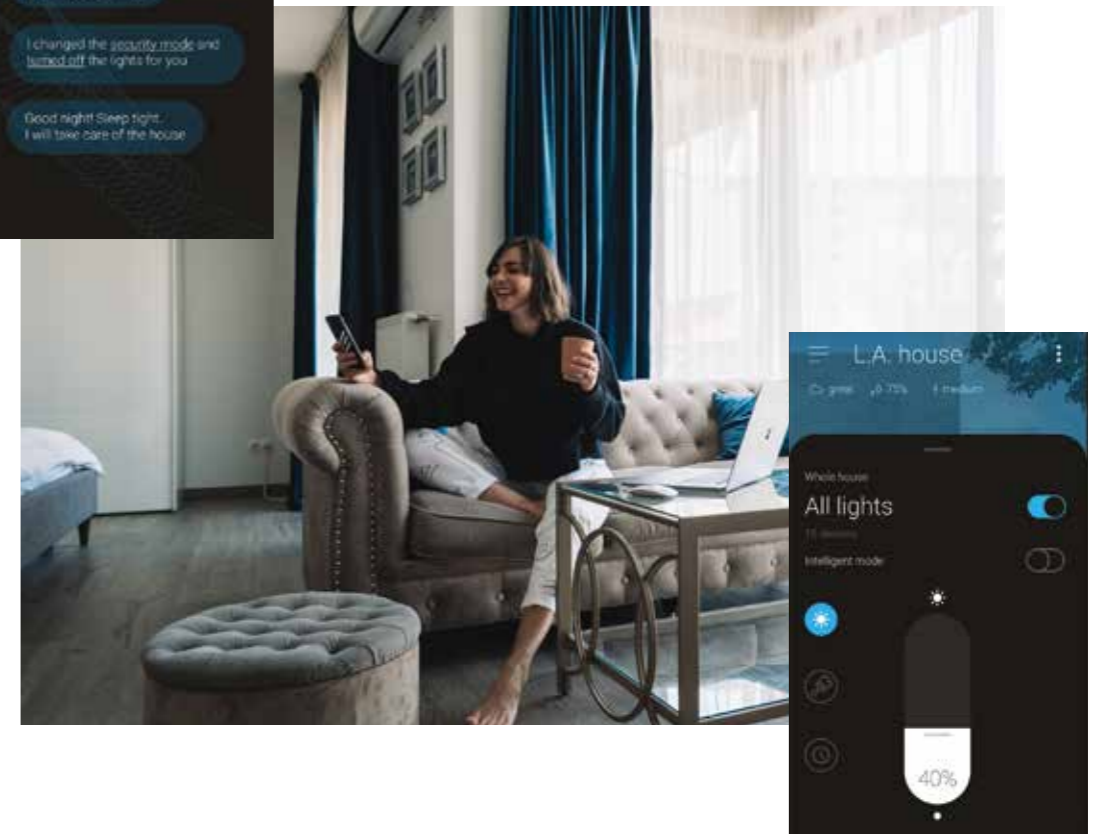

UFO is more than a normal controller: it's a voice assistant that enables constant interaction with the user. It recognizes faces, monitors the habits of individual users and recommends new lifestyles to encourage energy efficiency and aid sustainability.

Users can manage the home safely, simply and intuitively using the new Vitrum Design app, either through the native Voice Control system or integrated systems such as Amazon Alexa™ and Google Home™.

VITRUM DESIGN APP

New design and new interface.
 Personalizing and managing your home is simple
 and reliable thanks to the Vitrum Design app.
 Simplicity is the heart of any action.

Navigate rooms, view consumption and the status of your home.
 Use the Chatbot to communicate with your personal assistant.
 Get assistance: at any time it will tell you if you left a light on, activate a scenario for you,
 or alert you if you are consuming more than intended, and much more.

KNX SYSTEM

The Vitrum KNX Series has grown:
touch and analogue controls, actuators and interfaces,
web servers and gateways.

MODERN COMFORT

The first standard in the world for controlling technological systems
meets style and harmony with a Made in Italy solution.
Modernity that sees service as an added value.

P E R S O N A L S C E N A R I O

With Vitrum Design you can customize every room in your home. According to your habits, advanced KNX technology allows you to set scenarios in individual areas of the house. Enjoy the right atmosphere whenever you want.

BUILDING CONTROL

The Vitrum Design KNX line can be used for all possible applications and functions to control residences and buildings: lighting, shutter control, alarms and video surveillance, heat monitoring, ventilation and air conditioning, water control, energy optimization, load management and audio systems.

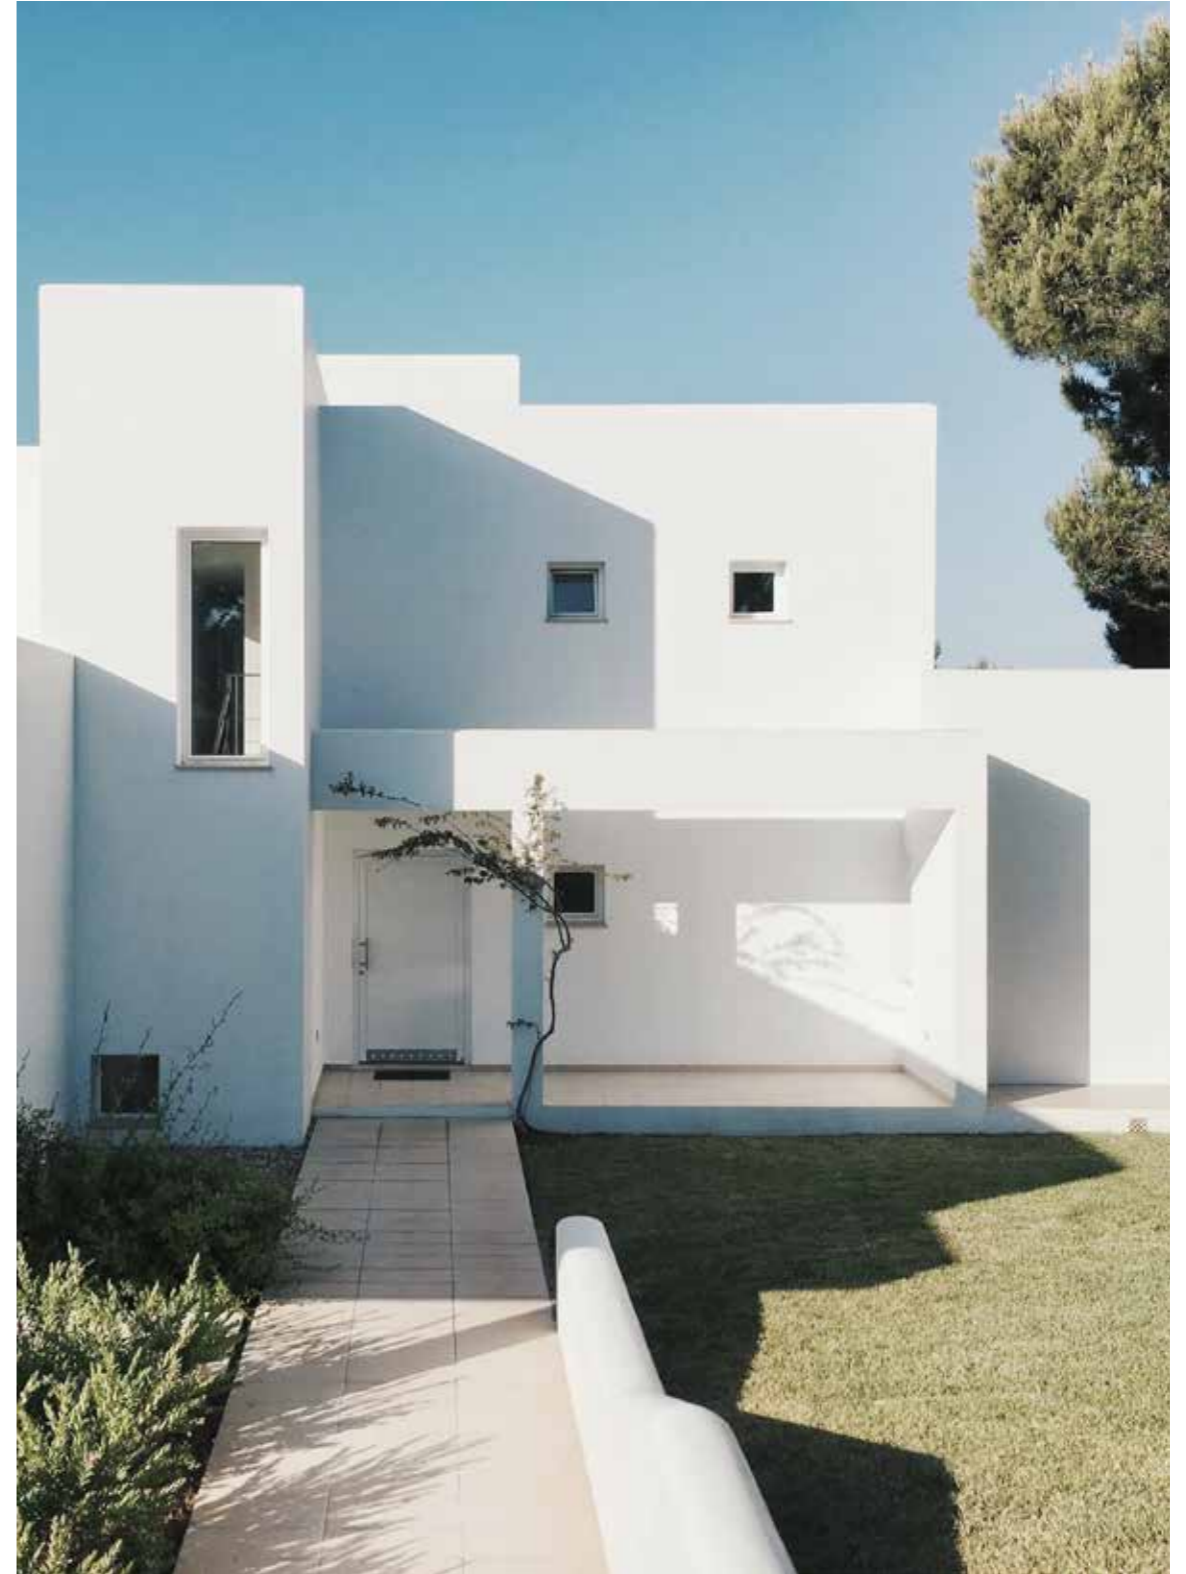

BUILDING AUTOMATION

Design. Technology. Comfort.

The elegance of Vitrum Design touch controls paired with an extensive line of solutions for KNX-certified home automation and intelligent systems offer an exceptional experience and unprecedented reliability.
